# The Legacy of Sabine

Overview:

You control the young and daring Sabine in her quest for wealth and fame. The fearless gypsy girl has broken into the temple of the vampire triplets Ichabod, Caera, and Austra. Alas, Sabine is trapped with no hope of escape - her legacy rests on how much treasure she can acquire before she is caught...
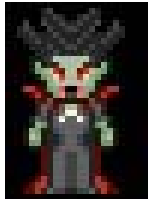

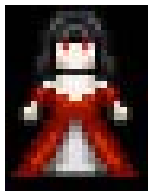

The Characters:

Sabine

Our daring protagonist, Sabine is a courageous young woman with thirst for wealth and glory. That dream has landed her in a situation she cannot escape from, but even in the face of death she remains determined and defiant.
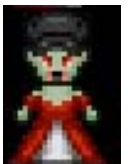

Ichabod

Ichabod the sorcerer cannot return to his human form like his sisters, but has gained incredible arcane power in paying that price. Magic spawns from him as he prepares to teleport to where Sabine came into range. Be careful! Making him change directions will cause him to teleport closer to Sabine.

Caera

Caera is prone to wandering at random through the temple. When she catches sight of Sabine she will run straight for her, returning to her wandering when Sabine gets away.

Austra

The shy sister, Austra stands waiting, watching Sabine as she wanders their temple. Her hunger takes over when Sabine comes close, matching her step for step.

Controls

Menu:

- Use W and S to toggle the highlighted menu item
- Use SPACEBAR to confirm your selection

Game:

- Use WASD to move Sabine
